

2019 NATURE DAY CAMP WEEKLY THEMES

Campers' days begin with outdoor education lessons centered on the natural environment at El Tesoro. Art projects and nature hikes reinforce morning lessons. After lunch, campers participate in adventure-filled activities including canoeing, kayaking, archery, horseback riding and a daily swim in the pool.

NATURE'S MASTERPIECE

June 3 - June 7

If you take a moment to sit and look, it is easy to find the beauty in nature. During this week, we'll stretch out our creative side to make a series of natural masterpieces. Campers will borrow from the beauty they discover outdoors to make artistic creations of their own. We'll explore the connection between science and art to spark a new curiosity.

OUTDOOR ADVENTURE

June 10 - June 14

Spend this week investigating ways to live outdoors! Campers will practice outdoor survival skills and master the art of tent camping. We'll have up close experiences exploring nature and discovering countless lifelong skills so campers can continue to spend their time outside.

BIG BUGS

June 17 - June 21

Campers will explore the world through a bug's point of view. We'll discover who's crawling around outside and investigate what makes different bugs unique! Up close encounters with these critters are sure to spark curiosity and satisfy the desire to explore the tiny world of bugs.

FLIGHT FASCINATION

June 24 - June 28

Take your fascination with flight to camp this week as we investigate how things fly and soar. We'll explore the principles of flight and compare how flying works in nature with human creations. The wings of a bat are different from the wings of an airplane, but both are able to fly. Come on out and we'll explore why!

ICE INVESTIGATION

July 1 - July 5

This week don't worry about the heat; instead, come on out to Day Camp for an ice investigation. Campers will beat the heat through hands-on activities that involve ice! We'll design frozen sculptures, explore dry ice, and maybe even dabble in popsicle science.

RECYCLE TO THE RESCUE!

July 8 - July 12

What?! That's not trash! Spend this week thinking outside the box to turn once used items into a new treasure. Let's support nature by giving single use products a second life. The only question now is, what can you create?

NATURE'S ENGINEERS

July 15 - July 19

Spend the week discovering nature's engineers. Campers will investigate how different animals use natural materials to change their habitats. Plus, flex your creativity as we work through a series of challenges." do we know what kind of challenges - physical, mental, team work? Come this week for a chance to test and engineer your very own creations.

EARTH'S ELEMENTS

July 22 - July 26

This week at camp, we will discover the powers of the Earth! Campers will explore the forces that shape our planet every day. Together the wind, water, sun, and rock make our planet unique and beautiful. Let's spend the week investigating not only how these elements work together but also how they collide.

SERVICE LEARNING

July 29 - August 2

Come out to camp for a week exploring hands-on projects to help beautify Camp El Tesoro. Campers will plant a new garden, build animal shelters, and discover even more ways to plan, create and build. Our projects will not only help the people at camp, but will also support the wildlife that lives here.
